

HOUSE OF LORDS
Select Committee on Artificial Intelligence
Report of Session 2017-19

**AI in the UK:
ready, willing and
able?**

Artificial Intelligence

How do we live well in a digital age?

What is Artificial Intelligence? 

Steven Croft, Bishop of Oxford  @Steven_Croft

Nine Key Issues

Public awareness, debate, scrutiny and trust

Weaponisation

Sexualisation

Leadership:
who shapes
the future?

Five overarching Principles

Artificial intelligence should be developed for the common good and benefit of humanity

Artificial intelligence should operate on principles of intelligibility and fairness.

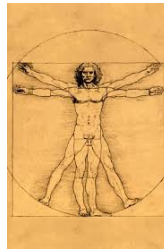

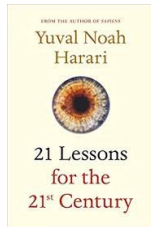

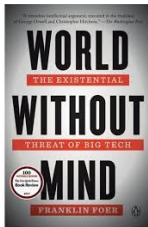

Artificial intelligence should not be used to diminish the data rights or privacy of individuals, families or communities

All citizens have the right to be educated to enable them to flourish mentally, emotionally and economically alongside artificial intelligence.

The autonomous power to hurt, destroy or deceive human beings should never be vested in artificial intelligence.

One big question
